

## ASAM Criteria for Level 3

### ASAM 3.1

- Clinically Managed Low-Intensity Residential Services for adolescent and adult level of care provides 24-hour community-based living support and structure. Members are provided stability and skill building to help prevent or minimize substance use. Includes a minimum of 5 hours per week of professionally directed treatment services.

### ASAM 3.2

- Clinically Managed Residential withdrawal program for adults only. Offers 24-hour structure and support to members experiencing moderate withdrawals. Members are provided 24-hour supervision, observation, and support in addition to daily clinical services. Providers offering this service must have an interdisciplinary team.

### ASAM 3.3

- Clinically Managed Population-Specific High-Intensity Residential Services for adults only. Offers 24-hour structure and support. Members are provided daily clinical services in addition to other daily scheduled treatment services. These services are provided to a member diagnosed with a moderate or severe SUD whose substance related problems have resulted in temporary or permanent cognitive deficits and are unlikely to benefit from other residential levels of care. Services are slower paced, repetitive, and designed to address significant cognitive deficits. Providers offering this service must have an interdisciplinary team.

### ASAM 3.5

- Clinically Managed Medium-Intensity Residential Services for adolescents and Clinically Managed High-Intensity Residential Services for adults, this level of care provides 24-hour professionally directed SUD treatment. Members are provided daily clinical services in addition to other daily scheduled treatment services. These services are provided to a member diagnosed with a moderate to severe SUD and whose substance related problems are so significant they require 24-hour supported treatment environment. Providers offering this service must have an interdisciplinary team.

## ASAM Criteria for Level 3

### ASAM 3.7

- Medically Monitored High-Intensity Inpatient Services for adolescents and Medically Monitored Intensive Inpatient Services Withdrawal Management for adults, this level of care provides 24-hour care with a physician's availability for significant problems. Members are provided a planned regimen of 24-hour professionally directed evaluation, observation, medical management/monitoring, and SUD treatment. Providers offering this service must have an interdisciplinary team.
