

## Tribal Consultation November 6<sup>th</sup>-7<sup>th</sup>, 2024: Primary Care Case Management Redesign Questionnaire:

- 1) How does the current claims data reporting process impact your ability to participate in value-based programs?
- 2) What administrative burdens do you anticipate in manually reporting quality metrics for a value-based program?
- 3) How would a potential downside risk adjustment factor affect your organization's willingness or ability to participate in the program?
- 4) What specific quality metrics would be most relevant and feasible for your clinics to report on?
- 5) How might participation in a value-based program impact your health care delivery?
- 6) What concerns do you have about Medicaid members being required to participate in this new program?
- 7) How might member participation affect access to culturally appropriate care for Native American members?
- 8) What unique challenges does your Tribe face in implementing care management practices required by value-based programs?
- 9) Does participation in a value-based program affect your ability to integrate traditional healing practices with Western medicine? If so, please describe the barriers.
- 10) What technical assistance or resources would your organization need to successfully participate in a value-based program?

- 11) How might participation in a value-based program impact your organization's current funding mechanisms for health care services?
- 12) Do you have any concerns about data sharing and privacy in relation to reporting quality metrics?
- 13) How could the program be designed to better accommodate the unique needs and circumstances of I/T/U health care providers?

Please fill out the questionnaire and return to:
