

PRIMARY CAREGIVER EXPECTATIONS

Every child has a Primary Caregiver assigned to them for a significant portion of the time the child is in attendance.

The Primary Caregiver will assess and provide care and education services for each child in their care based on the child's strengths, interests and needs.

The Primary Caregiver will assess and incorporate elements of each family's culture, goals, and aspirations for their child into each child's individual care and education plan.

The Primary Caregiver will work on a regular basis with the families and other child care program staff in planning for the child.
