

# TABLE CLEANING AND SANITIZING FOR THE ENVIRONMENT RATING SCALES

CLEAN	SANITIZE
Clean with soap and water  Wipe with a paper towel	Sanitize with bleach solution (3/4 tsp bleach per quart of water***)  Allow to air dry or to remain on surface for at least 2 minutes, then wipe with a paper towel

Check the label to see if your bleach is intended for sanitizing/disinfecting, and ensure the product is not past its expiration date. Some bleaches, such as those designed for safe use on colored clothing or for whitening may not be suitable for sanitizing/disinfecting.

Follow manufacturer's instructions for application and proper ventilation of bleach and EPA approved sanitizers.

Never mix household bleach with ammonia or any other cleanser.

*\*\*\*Add bleach to the water rather than water to the bleach to reduce fumes.*
