

# 2019 imMTrax Participation Estimates Among Montana Residents

imMTrax assists health professionals in making appropriate immunization decisions and ensuring Montanans are immunized on time, every time!

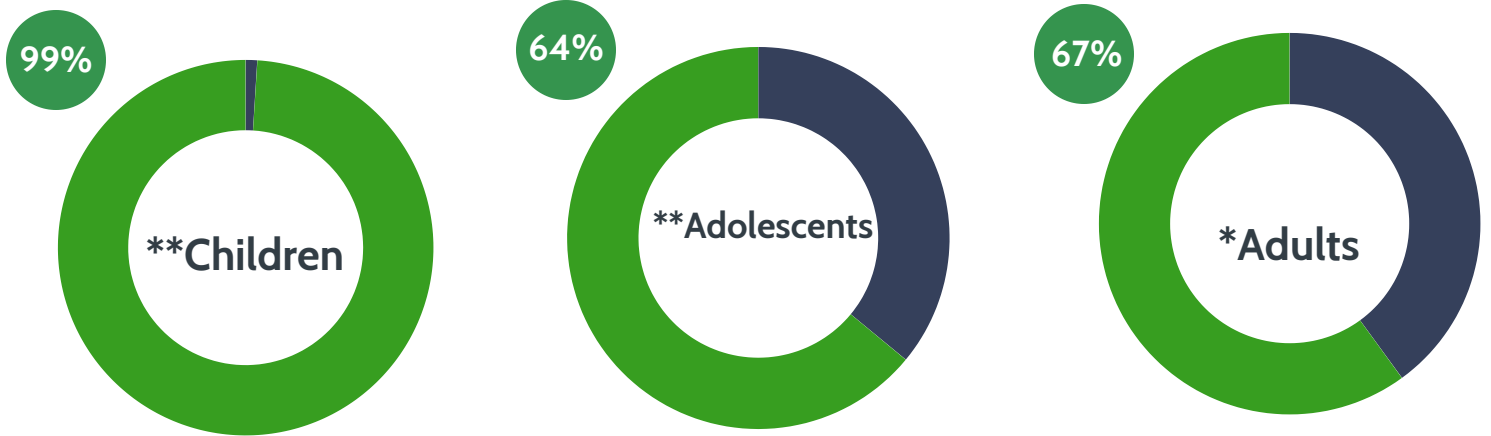

## Former and current Montana residents with a record in imMTrax??

-----  
**Over 1.3 Million**

## Comparing Census Estimates to imMTrax Records:

Includes records with at least \*one or \*\*two select vaccines, varying by age group.

Age Groups Evaluated: Children = 4 months to 5 years (two vaccines). Adolescents = 11 to 17 years (two vaccines). Adults = 19 years and older (one vaccine)

## What is imMTrax?

Montana's Immunization Information System (imMTrax) is a confidential, computerized database that stores immunization records for Montanans of all ages. imMTrax combines records from multiple immunization providers to form one shot record.

# 14 Million Immunizations Added Since 2013!
