

KNOW THE RISKS ENJOY THE BENEFITS

Wash
hands after
contact with
poultry!

POULTRY

Risk of Salmonella or Campylobacter infection is 5 times greater for those who have contact to live poultry in Montana.

BACKYARD

84% of poultry exposures occur at home and only 13% reported recently acquiring a new animal.

EGGS

25% of Salmonella submitted to the state laboratory were serotype Enteritidis, commonly linked to eggs and poultry.
