

# Montana Public Health Summer Institute 2002- 2019

The field of Public Health is broad. Public Health Professionals require expertise in multiple subjects including **Public Health Practice** and **Leadership Skills, Communicable Disease Prevention and Control, Epidemiology, Environmental Health** and **Emergency Preparedness**.

## Participation by General Topic

## Public Health Institute Participants, Montana 2002-2019

\*Years with a spike in attendance can be attributed to increased participation from public health partners, including hospital and clinical staff.

The Montana Public Health Summer Institute provides short-term, intensive educational opportunities for public health system professionals, community partners, and students every summer since 2002. Since inception Summer Institute has provided **over 100 educational opportunities** with an **average yearly attendance of 125 participants**.
