2015

78%
2016*

*Reported as of 11/30/16, addition inspection dates will be entered at the completion of the quarter. The number of licenses in 2016 declined as a result of legislation no longer requiring a state issued license for temporary events.

State law requires the annual inspection of licensed facilities to ensure legal and safe operation. The majority of inspections are conducted by the dedicated Registered Sanitarians employed by local public health agencies. Establishment operators and sanitarians work collaboratively to protect the health and safety of the state's residents and visitors.
