1,750 copies of this public document were published at an estimated cost of \$0.16 per copy, for a total cost of \$280.00, which includes \$280.00 for printing and \$0.00 for distribution.

imMTrax & Your Child

Information for Parents

What is *imMTrax*?

Montana's Immunization Information System (*imMTrax*) is a confidential computer program that can hold immunization records for Montanans of all ages. *imMTrax* combines records from multiple immunization providers to form **one shot record**.

imMTrax helps healthcare providers make sure Montana's kids, teens, and adults are protected from serious diseases.

imMTrax is provided by the Montana Department of Public Health and Human Services.

How can *imMTrax* help my family?

Preserve Your Child's Shot Record

By age 6, a child will have received several shots to prevent serious diseases. *imMTrax* keeps your child's immunization history in one record, even if you move or change healthcare providers.

Your child's record will also be available as they need it for entry to child care, school, or college.

1 out of 5 children in the US will see more than one healthcare provider by age 2.

Improve Your Child's Medical Care

imMTrax combines records from multiple immunization providers to form one shot record. Having one *imMTrax* record allows your healthcare provider to make sure your child is up-to-date with their shots.

Participating in *imMTrax*

Most healthcare providers seeing children in Montana participate in *imMTrax*. Ask your child's provider to be sure.

Whether your child's immunization records are put into *imMTrax* is 100% up to you. Montana law says that consent must be given by a parent or guardian to be included in *imMTrax*. Consent can be withdrawn at any time.

imMTrax Records Commonly Include:

- » Child's Name, Birth Date, and Gender
- » Parent/Guardian Name, Address, and Phone Number
- » Child's Shot History
